

# Your Arsenal cards can now be included in your digital wallet

Your Arsenal Visa® credit and debit cards are compatible with Apple Pay®, Android Pay™ and Samsung Pay®.

## Checking device compatibility

Due to the technology required to securely relay payment information from your personal device to a payment terminal, not all devices will be equipped to utilize mobile payments. If you're not sure if your device meets the criteria for mobile payments, please refer to your smartphone manufacturer's website.

## Setting up your mobile wallet

Depending on your smartphone make and model, your setup process may vary. Please refer to the following guides below:

- Apple iPhone / Watch – <http://bit.ly/ApplePaySetup>
- Android Devices (Samsung, LG, HTC, etc.) – <http://bit.ly/AndroidPaySetup>
- Samsung Galaxy – <http://bit.ly/SamsungPaySetup>

## Making a payment at participating merchants

Once your Arsenal Visa credit and/or debit card has been securely stored on your device, using mobile banking is easy. After your cashier is ready to accept your method of payment, simply hold your device one inch above the payment terminal. Depending on your device's capability, you will be prompted to authenticate your purchase by inputting your lock screen pass code or digital fingerprint.

You will hear an audible sound from your device, accompanied by a vibration signifying the payment was transferred to the terminal.

And that's it! You just used your new, secure mobile wallet! Welcome to the next phase of the payment revolution.
